ABOUT

Senior Frontend Developer with 5+ years of commercial experience and a degree in Software Engineering. Experienced in building modern web applications using **React** and **Vue** with **TypeScript**, following best practices and leveraging AI tools to improve development efficiency.

Worked in both small outsourcing teams and product companies. Developed pixel-perfect landing pages, implemented analytics and SEO, optimized high load components, and led product redesigns and refactoring initiatives.

As a Senior developer, took ownership of tech stack choices, collaborated with customers on requirements, onboarded new members, worked closely with backend engineers, designers, and analysts to improve product quality.

Have a solid understanding of full application architecture, with hands-on backend experience and familiarity with Figma and Jira.

SKILLS

Frontend: TypeScript, JavaScript, Vue (v2-v3), React (v16-v18), Nuxt.js, Next.js, REST API, WebSockets, Cypress, Jest, Lighthouse (performance optimization), HTML, SCSS, Micro-frontends, Monolith, Flux, FSD, a11y, responsive, cross-browser, Vite, Webpack, Babel, ESLint, Prettier.

Other: Figma, Jira, NestJS, Electron.js, FastAPI, PostgreSQL, MongoDB, GraphQL, UML, Git Flow, Docker, Kubernetes, Python, Go, C++

EXPERIENCE

Senior Frontend Developer – CROC

10/2025 - PRESENT 1+ year

Web UI designed for managing containers, applications, and cluster infrastructure based on Kubernetes.

- Collaborated with analysts and designers to define application workflows and led a product redesign, increasing its market attractiveness and usability for enterprise users.
- Refactored legacy code by removing outdated modules, improving code readability, and reducing First Contentful Paint (FCP) by around 2 seconds.
- Covered ~20% of critical functionality with automated tests, including cross-domain authentication scenarios.
- Prepared project documentation and designed a reusable micro-frontend plugin template, accelerating onboarding for new team members and speeding up the development of new plugins.
- Made packages audit using AI-powered tools and resolved over 500 vulnerabilities.

Technologies: TypeScript, Vue, Vuex, React, Redux, SCSS, HTML, Micro-frontends, Cypress, Kubernetes, REST API, WebSockets, GraphQL.

Middle Frontend Developer – CYNO.ONE

07/2023 - 10/2025 2,3 years

Outsourcing and outstaffing team delivering a wide range of products, from marketing landing pages and Telegram Web Apps to complex web applications.

- Implemented SEO best practices, improving search engine visibility and increasing organic traffic.
- Integrated Google Analytics, enabling data-driven decisions.
- Delivered cross-browser and mobile-friendly UI, including iOS-specific styling, reducing UI-related bugs and support requests.
- Led projects by planning tasks, coordinating team efforts, and consistently delivering projects on time.

Technologies: TypeScript, Vue, Pinia, Nuxt.js, React, Redux, Next.js, Tailwind, SCSS, HTML, Jest, REST API, Telegram API, Chat GPT

Junior Fullstack Developer – ETU LETI IT Department

04/2022 - 07/2023 1,3 years

Internal development team building web applications to automate university business processes.

- Optimized high-load data tables, reducing Largest Contentful Paint (LCP) by several seconds for data-heavy views.
- Collaborated directly with end users to gather feature requirements, increasing application usability and adoption.
- Migrated legacy code to newer package versions, enabling further development and long-term maintainability of the applications.

Technologies: TypeScript, Vue, Pinia, Bootstrap, SCSS, HTML, NestJS, PostgreSQL, REST API.

EDUCATION

Bachelor's Degree in Software Engineering

Saint Petersburg Electrotechnical University

2020 - 2024
